PROJECTS

BookBazaar: Online Bookstore Management System
- Using ASP.NET Core, Entity Framework, C#, SQL.
- BookBazaar is an end-to-end online bookstore management system designed to ordering books.
- Users can easily browse, search and order books after registering and logging in to their accounts.
- Administrators have access to a wide range of functionalities, including managing categories, adding, updating and deleting products, they have the authority to manage orders placed.

Amazon Website Clone
- Using HTML, CSS, Javascript.
- It's a simplified version of the Amazon website interface. Focus on replicating key features like product listings, search functionality and a user-friendly layout.

Contact Management System
- Using Angular, ASP.NET Core API, Entity Framework Core.
- Developed a comprehensive Contact Management System utilizing Angular for the front-end and ASP.NET Core for the back-end to perform CRUD operations.
